

Anirudh Pahwa

New Delhi, Delhi | anirudhpahwa12@gmail.com | +91 9560145222 | [github](#) | [linkedin](#) | Open to Relocate

EDUCATION

CBSE Class X & XII, *Sri Venkateshwar International School*

April 2021 - April 2023

B.Tech. in Computer Science & Engineering, *Guru Gobind Singh Indraprastha University (GGSIPU)* GPA: 8.6/10

Aug 2023 - Aug 2027

Coursework: Data structures and Algorithms, Object oriented programming, Software Engineering, Artificial Intelligence

PROJECTS

Notification Engine – Event-Driven Backend System [\[Github Link\]](#)

- Designed and built an event-driven backend system using FastAPI, Celery, Redis, and PostgreSQL to handle asynchronous notification workflows.
- Implemented background task processing with Celery and Redis, enabling scalable and non-blocking event handling.
- Developed a modular notification pipeline (event → processing → delivery) with multi-channel support using strategy pattern.
- Containerized the system using Docker Compose (API, PostgreSQL, Redis, Celery worker) for reproducible and scalable deployment.

Scribble Arena – Real-Time Multiplayer Drawing Game (Next.js, FastAPI, WebSockets) [\[Github Link\]](#)

- Built a real-time multiplayer drawing and guessing game with room-based architecture using **Next.js** and **FastAPI**.
- Implemented **WebSocket-based** communication for low-latency synchronization of drawing data across multiple clients.
- Designed backend room management system handling player sessions, game state, and lobby synchronization.
- Developed interactive canvas with custom drawing tools (brush, color palette, eraser) and optimized event handling.
- Debugged and resolved complex issues in real-time systems including WebSocket synchronization, state desync, and client identity handling.
- Containerized the full application using **Docker (PostgreSQL + Redis + services)** for scalable local development.

Smart Job Tracker – Backend System [\[Github Link\]](#)

- Built a production-style backend system using Django REST Framework with JWT-based authentication and secure user-specific data access.
- Designed RESTful APIs for job tracking with support for filtering, search, and pagination.
- Developed an analytics engine to compute metrics such as response rate and interview conversion using aggregated data.
- Implemented asynchronous background processing using Celery and Redis to improve performance and offload heavy computations.

EXPERIENCE

L.O.G.I.C - Founder & Game Development Head

July 2025 - Present

- Led development of multiple student game projects, managing technical planning and iteration cycles.
- Coordinated cross-functional teams to deliver playable builds and improve development velocity.

Centre for Railway Information Systems (CRIS), India - Intern

July 2024 - August 2024

- Assisted with testing and documentation in large-scale automation systems.
- Worked within structured engineering workflows emphasizing reliability and system integrity.

IRCTC (Indian Railway Catering and Tourism Corporation) - Frontend Developer Intern

July 2025-August 2025

- Developed and improved frontend components for a high-traffic platform, focusing on responsiveness and usability.
- Enhanced cross-browser compatibility and UI performance for large-scale public usage.

Midknight Esports Club | SKOAR! College Gaming Club - President | Campus Ambassador

Mar 2025 - Present

- Led planning and execution of collegiate esports tournaments, managing formats, scheduling, and live operations.
- Coordinated cross-functional teams (organizers, referees, casters) and resolved real-time issues to ensure smooth event flow.
- Supported the execution of a large-scale collegiate esports tournament, contributing to coordination and on-ground operations.

SKILLS

- Languages:** Python, C++, Java, C, JavaScript, HTML, CSS
- Concepts:** Object-Oriented Programming, Data Structures & Algorithms, REST API design, WebSockets, Event-Driven Architecture, Compiler Design, PostgreSQL, Redis, Data Modeling, Query Optimization, Computer Networks, Client-Server Architecture, State Management, Real-Time Systems, Iterative Development, Distributed Systems Basics, Agile Development (Scrum basics)
- Tools & Technologies:** FastAPI, Django REST Framework, Redis, Celery, WebSockets, Docker, Visual Studio, Generative AI, PostgreSQL, Git, Next.js, React, Unreal Engine, VR Development, Diversion,
- Soft Skills:** Public Speaking, Conflict Resolution, Leadership, Event Management, Interpersonal Skills, Communication, Problem Solving.
